

# Native Human Thyroid Tissue

Use our high-quality human thyroid tissue for purification of native human thyroid peroxidase (TPO) and thyroglobulin (Tg). Benefit from native material instead of recombinant proteins.

## Specifications

- Native material, no formalin fixation!
- Storage: <-20°C
- Infectiology testing: HCV, HIV and HBV
- Single thyroid glands > 5 g each
- Set of thyroid glands, each gland < 5 g

**On stock - fast delivery and certified quality!**

## Further Offers

- Support in purification and quality control
- Ready-made purified native human thyroid peroxidase (TPO) and thyroglobulin (Tg)
- Positive anti-Tg / anti-TPO pool of native human serum for purification of polyclonal human antibodies
- ELISA for quantification of human TPO
- Clinical serum samples of patients with thyroid disorders e.g. Graves' disease
