

## Product Datasheet

### Pool of Carbohydrate Deficient Transferrin (CDT)

#### True Human Serum off the Clot

#### Application:

The in.vent Pools of Carbohydrate Deficient Transferrin (CDT) are designed for the use throughout the whole value chain of in-vitro diagnostic test kits, e.g. for R&D and Quality Control Departments. Human Serum is used for production purposes, like production of standards, calibrators or controls for IVDs or EQAS.

<b>Product No.:</b>	DSPO 4.2.1.1.2
<b>Bottling</b>	100 ml
<b>Source Material</b>	true human serum off the clot
<b>Details given</b>	product number, sample number, volume, matrix, age, gender, titer, assay system, minimum shelf life
<b>Titer</b>	4-5 % Carbohydrate Deficient Transferrin (CDT), measured by High Performance Liquid Chromatography (HPLC)
<b>Test Samples</b>	1.0 ml
<b>Disease State Testing</b>	Each individual donation has been tested with methods cleared in compliance with European Directive 98/79/EC and found negative for HBsAg, anti-HIV I+II, anti-HCV, HIV I RNA, HCV RNA, HBV DNA, HCV, RNA, Syphilis.
<b>Materials Safety</b>	These methods cannot eliminate possible infectivity of the material. All material of human origin is to be regarded as potentially infectious. Therefore, standard precautions are necessary, if handling the material.  All products are for research or manufacturing purposes only and are not for direct therapeutic or diagnostic use in humans or animals.
<b>Storage</b>	≤ -15°C
<b>Minimum Shelf Life</b>	24 months
<b>Manufacturing Quality System</b>	in.vent Diagnostica GmbH operates a quality management system, which complies with the requirements of DIN EN ISO 9001 and DIN EN ISO 13485.
<b>Pricing</b>	Please inquire for your individual quote.
